

Flood Roofing — straight-gable sheet-layout test set

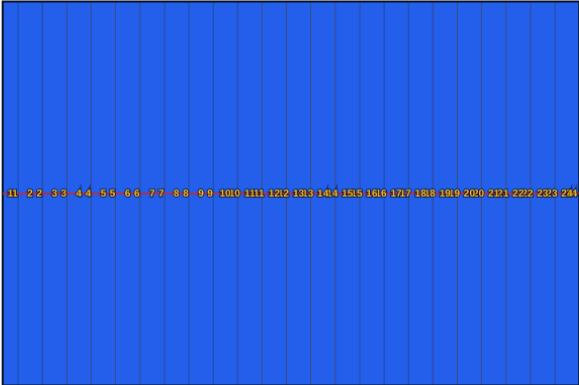

Eight gable shapes ranging from wide low (3:1) through square (1:1) to tall portrait (1:2.25). Each diagram is generated by the production engine (post c09ccd8 sheet-plan restoration). Each gable produces two equal-length face sheet sets running ridge → gutter, with ridge orientation chosen automatically along the long axis.

A — Standard gable

900 × 600 (1.50:1)

24 sheets · 48 strips · 12.94 m sheet

long-side: 24sh × 2strip

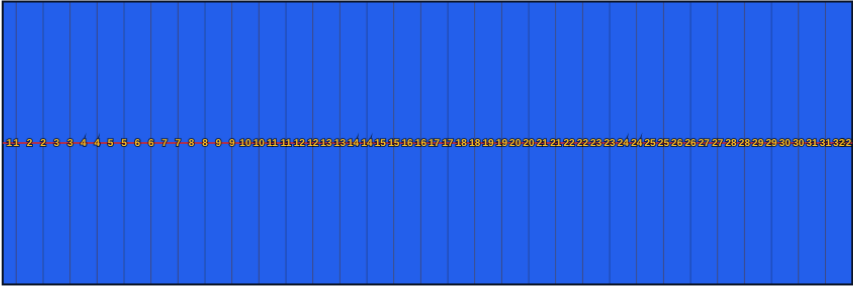

B — Wide low gable

1200 × 400 (3.00:1)

32 sheets · 64 strips · 8.63 m sheet

long-side: 32sh × 2strip

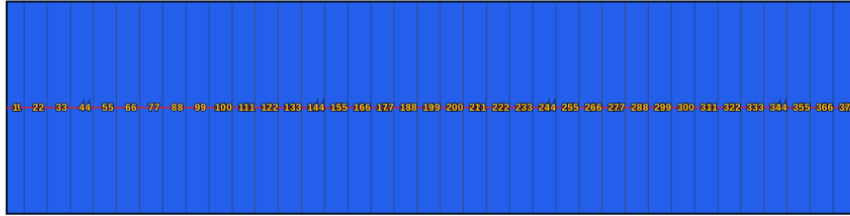

C — Long farm-shed gable

1400 × 350 (4.00:1)

37 sheets · 74 strips · 7.55 m sheet

long-side: 37sh × 2strip

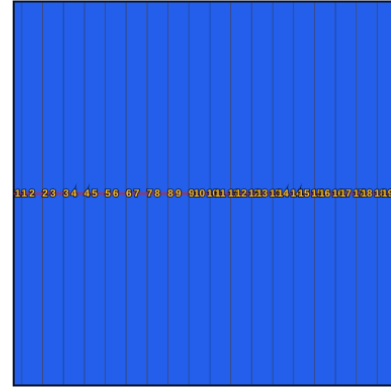

D — Square gable

700 × 700 (1.00:1)

19 sheets · 38 strips · 15.10 m sheet

long-side: 19sh × 2strip

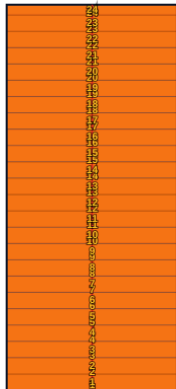

E — Tall narrow gable

400 × 900 (1:2.25 portrait)

24 sheets · 48 strips · 8.63 m sheet

long-side: 24sh × 2strip

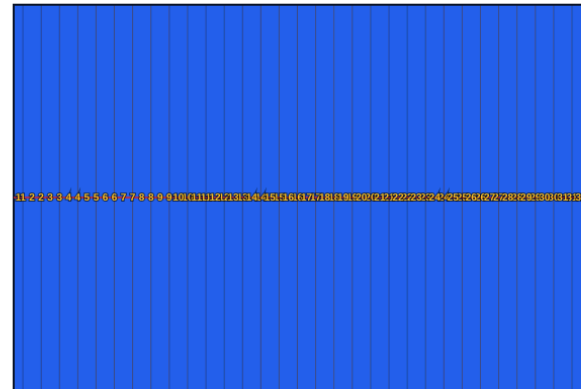

F — Big gable

1200 × 800 (1.50:1)

32 sheets · 64 strips · 17.26 m sheet

long-side: 32sh × 2strip

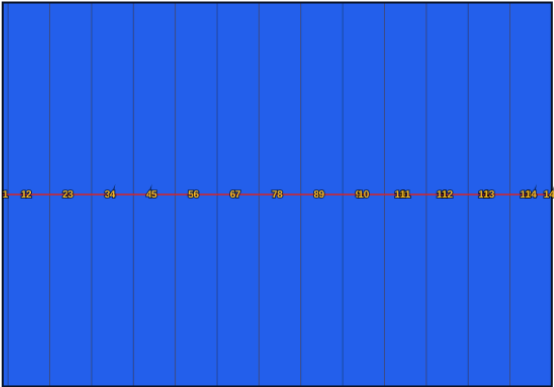

G — Small compact gable

500 × 350 (1.43:1)

14 sheets · 28 strips · 7.55 m sheet

long-side: 14sh × 2strip

H — Garage-style gable

600 × 450 (1.33:1)

16 sheets · 32 strips · 9.71 m sheet

long-side: 16sh × 2strip
