

Flood Roofing — sheet-layout diagram across test roofs

Each diagram is generated by the production sheet-plan engine. Coverage stats (gap% / overlap%) computed by a 5px raster over the roof polygon; CLEAN = both under 1.5%.

CLEAN

Simple hip — 900×600 rectangle

24 sheets · gap 0.0% · overlap 0.0%

A diagram of a simple hip roof layout. The roof is a rectangle with a diagonal ridge. The layout consists of 24 sheets, represented by orange and blue rectangles with diagonal hatching. The sheets are arranged in a symmetrical pattern around the ridge, with some sheets overlapping. The diagram shows the arrangement of 24 sheets (12 orange, 12 blue) covering the roof. The sheets are arranged in a symmetrical pattern around the ridge, with some sheets overlapping. The diagram shows the arrangement of 24 sheets (12 orange, 12 blue) covering the roof.

Straight gable — 900×600 rectangle

24 sheets

A diagram of a straight gable roof layout. The roof is a rectangle with a horizontal ridge. The layout consists of 24 sheets, represented by orange and blue rectangles with diagonal hatching. The sheets are arranged in a symmetrical pattern around the ridge, with some sheets overlapping. The diagram shows the arrangement of 24 sheets (12 orange, 12 blue) covering the roof.

Dutch gable — 900×600 rectangle

24 sheets

A diagram of a Dutch gable roof layout. The roof is a rectangle with a horizontal ridge. The layout consists of 24 sheets, represented by orange and blue rectangles with diagonal hatching. The sheets are arranged in a symmetrical pattern around the ridge, with some sheets overlapping. The diagram shows the arrangement of 24 sheets (12 orange, 12 blue) covering the roof.

Mono pitch — 900×600 rectangle

24 sheets

A diagram of a mono pitch roof layout. The roof is a rectangle with a horizontal ridge. The layout consists of 24 sheets, represented by orange and blue rectangles with diagonal hatching. The sheets are arranged in a symmetrical pattern around the ridge, with some sheets overlapping. The diagram shows the arrangement of 24 sheets (12 orange, 12 blue) covering the roof.

CLEAN Canonical Big-L — wing 300×300 / main 900×700

70 sheets · gap 0.0% · overlap 0.0%

CLEAN Small Big-L — wing 200×200 / main 700×500

55 sheets · gap 0.1% · overlap 0.0%

CLEAN Wide-wing L — 356×329 / 972×615

78 sheets · gap 0.0% · overlap 0.0%

CLEAN Tall-wing L — 300×520 / main 800×360

81 sheets · gap 0.0% · overlap 0.0%

CLEAN

Fat-wing L — 520×300 / main 900×600

73 sheets · gap 0.0% · overlap 0.1%

CLEAN

T-shape — cap 900×260 / stem 300×460

48 sheets · gap 0.0% · overlap 0.0%
