MONTHLY TREND

12-month

Labour hours

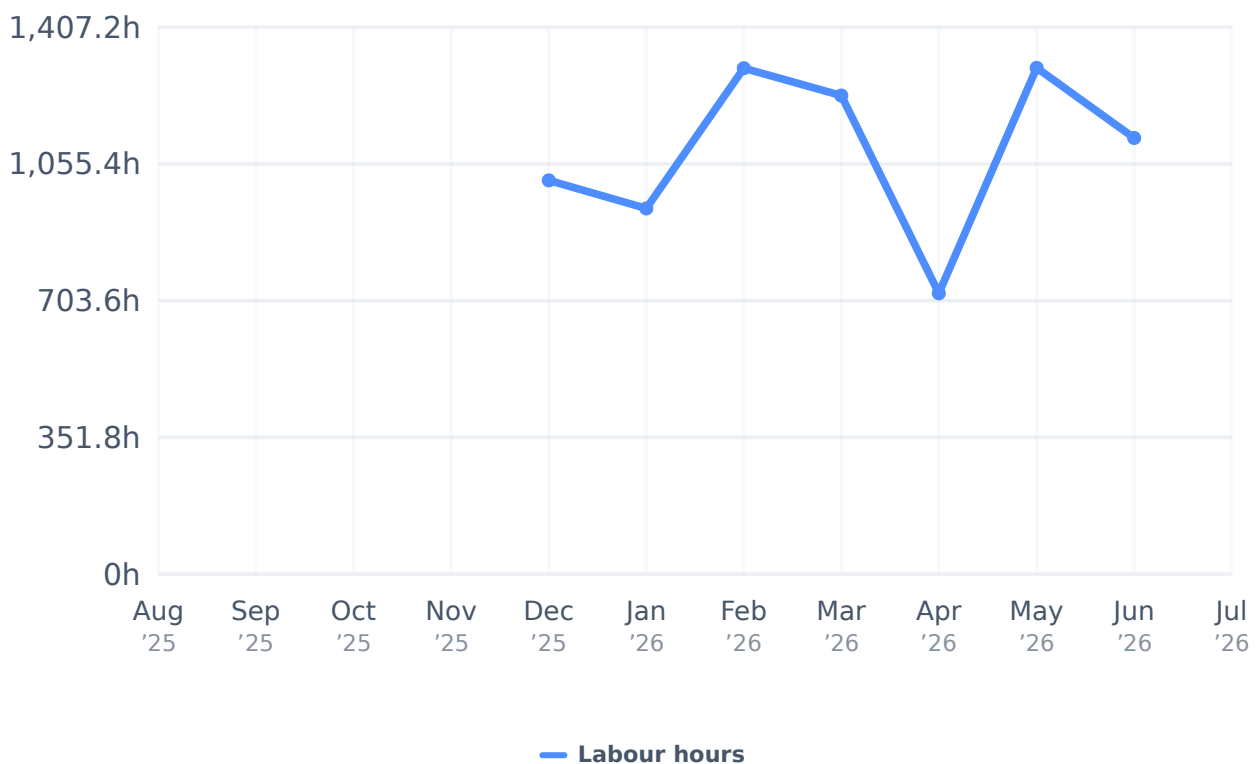

Avg GP / hr

Monthly

3-mo rolling avg

By work done that month (est)

By completed jobs

By work done that month: each job's hours are split into the months they were logged (from time entries) and every hour valued at that job's GP/hr. **Unfinished jobs are estimated** — revenue × the average completed margin (26%) over their priced hours — so a live month isn't understated. Jobs with **no hours logged are ignored** (a revenue-only entry is usually just a deposit). **15 skipped.**

(Fergus only exposes recent time entries, so months build up their real hour-splits from now on.)

COMPLETED JOBS (6 MO)**57**

57 w/ materials · 0 without

REVENUE (6 MO)**\$2004k**

\$609k materials cost

These are your last 6 months of back-costed jobs — jobs invoiced ~100% (deposit + final both raised) or marked Completed in Fergus. 57 such jobs (57 had materials recorded, 0 didn't — older jobs). Materials % = materials cost ÷ revenue across the 57 jobs with materials = 30% (blended with the rest: 30%). Labour is NOT included. Set your deposit ≈ 30%. A completed job only appears here if its paid invoice carries the job number in its Xero reference, so the true count may be slightly higher.

Profit & Loss

REVENUE — EARNED (WORK ACTUALLY DONE)	
Recognised revenue	\$263,500
COST OF SALES	
Materials	\$56,270
Labour	\$0
Other job costs	\$145,180
Gross profit	\$62,050 (24%)
OPERATING EXPENSES	
Overheads (from Xero)	\$67,500
Net profit	-\$5,450 (-2%)

Xero P&L revenue for **Jun-2026** was **\$346k** — that includes 50% deposits on jobs not yet done. Earned revenue (work actually completed that month) is **\$264k** — about **\$82.5k** of the Xero figure was deposits / unearned.

WORK IN PROGRESS — EARNED VS DEPOSITS HELD**LIVE JOBS — CONTRACT****\$862k**

15 jobs in progress

EARNED SO FAR**\$75.3k**

revenue recognised (cost-to-cost)

DEPOSITS HELD — LIABILITY**\$206k**

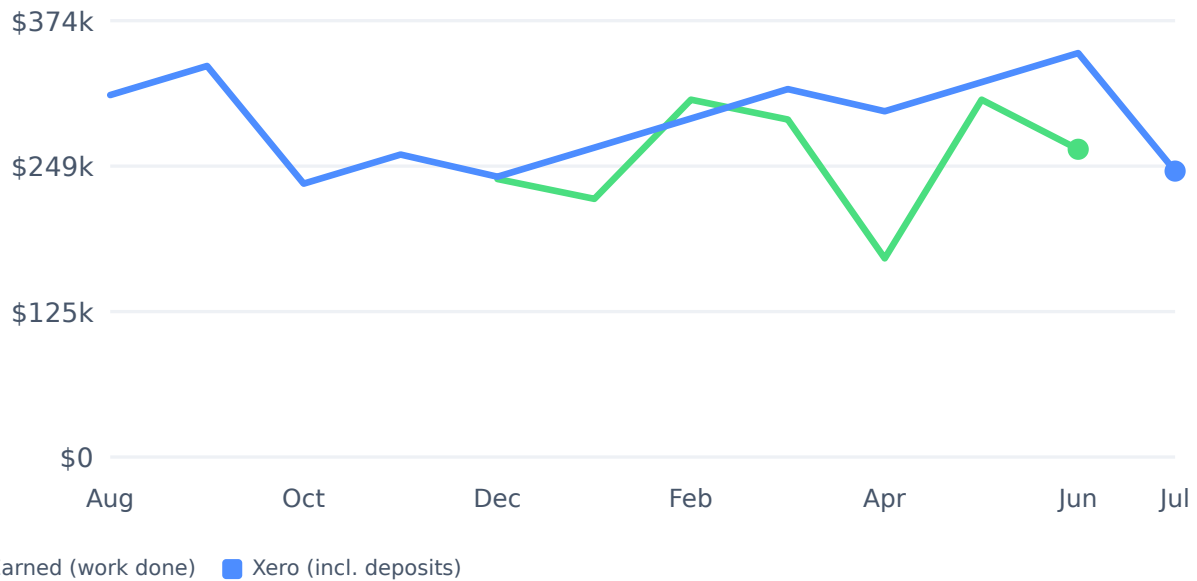

billed, not yet earned

WORK DONE, NOT BILLED**\$41.1k**

contract asset (CIP)

EARNED VS XERO REVENUE

12 months

RECONCILIATION — DO THE TWO P&LS TIE OUT? ?

COMPLETED JOBS — EARNED

\$1794k

35 finished jobs

...INVOICED (= XERO BOOKS)

\$1794k

✓ identical total

DEPOSITS HELD — LIABILITY

\$206k

Xero booked, not yet earned

WORK DONE, NOT BILLED

\$41.1k

earned, not yet in Xero

They tie out. On a **completed** job both P&Ls book the full contract — this one spreads it across the work, Xero splits it 50% deposit / 50% completion, but the total is the same (**\$1794k** earned = **\$1794k** invoiced). The only standing gap is on live jobs: Xero has recognised **\$206k** of deposits this P&L hasn't earned yet, less **\$41.1k** of work earned but not yet billed — a net **\$165k** of pure timing that reverses to zero as those jobs finish. That is exactly the difference between the two revenue lines above.

11% margin · \$603k/yr

vs your **8 guys now** (\$80.2k/mo GP): **+\$40.1k/mo** → **+\$481k/yr** at 12 guys, if each guy keeps getting through ~38 h/week at \$61/hr GP.

IF YOU ADD GUYS

same real \$/hr

GUYS	HRS/MO	REV/MO	GP/MO	GP/YR
8	1310	\$308k	\$80.2k	\$962k
9	1474	\$346k	\$90.2k	\$1082k
10	1638	\$385k	\$100k	\$1202k
12	1966	\$462k	\$120k	\$1443k
14	2293	\$539k	\$140k	\$1683k
16	2621	\$616k	\$160k	\$1924k

HOW THIS IS WORKED OUT

Fergus only

Built **only from Fergus** — no P&L, no Excel back-costing. Your guys got through **\$235/hr** revenue and **\$61/hr** gross profit across **35 Fergus jobs** (7,635 logged hours). Right now **8 guys** log about **302 h/week** (38 h each). Growth just scales those real hours: **12 guys × 38 h/week × \$61/hr**. Net profit subtracts your **\$70.0k/mo** office overhead.
